Zoological reference list of the Faroe Islands

draft manuscript, 23 February 2011

Dorete Bloch, Marianna Debes Dahl, Eyðfinnur Magnussen and Susan Bjerre Skaaning

Introduction

The Faroes had no resident scientists working permanently at local institutions until the latter half of the 20th century. But over the years, various scientists from all over the world have visited the Faroes, and nearly every account of the country includes detailed descriptions of Faroese flora and fauna. Visiting scientists have often published their reports in journals in their own countries, and this has made the task of tracing all published or unpublished accounts of Faroese Nature a rather difficult one. Scientists working in the Faroes have long felt the need for a comprehensive reference list of accounts and studies of Faroese Nature.

Material and Methods

Listed references range from the earliest known accounts to the end of.

This paper is divided into five parts, according to the respective fields of interest of the authors. Therefore, references to Faroese fauna not represented in these parts, i.e. the marine fauna except the marine mammals, will be dealt with by other authors. Moreover the last three parts all cover vertebrates, but cause the references are numerous concerning two, these have got their own parts, and the last its own for not being ousted by the two other.

- | | |
|--|---------|
| 1) Some general references including items from the following five parts | page 4 |
| 2) Terrestrial invertebrates | page 6 |
| 3) Freshwater animals | page 19 |
| 4) Ornithological references | page 21 |
| 5) Marine mammals | page 56 |
| 6) Remaining vertebrates not included above, the terrestrial | page 79 |

References are listed alphabetically according to first author inside each part. All abbreviations of journals are the standard abbreviations used by those journals.

When compiling a reference list, the decision to include or exclude particular references is often a subjective one. We have decided, in particular as regards bird life, to include all letters and accounts, such as those of individual travellers, as well as the reports of visiting ornithological societies. Some general accounts have also been published in a Faroese newspaper, *Dimmalæting*, over the years, and we felt these should also be included.

As far as published references are concerned, we have tried to include all articles from journals or books in which Faroese fauna has been discussed either in specific chapters, or in connection with taxonomical or geographical comparisons.

A collection of nearly all the listed references is found in the Zoological Department of the Museum of Natural History in Tórshavn, to which the general public has access. Most of the same references are also found in the National Library in Tórshavn. An asterisk (*) following a reference means that it is available in the library of the Zoological Department, Faroese Museum of Natural History, Fútalág 40, FO-100 Tórshavn; phone +298 318588; telefax +298 318589; e-mail: doreteb@ngs.fo.

There are doubtlessly many references which have been overlooked in this list, and we would therefore appreciate information on further references known to users of this list which would help to make it as comprehensive as possible.

Acknowledgments

Many people have been involved with the compilation and review of this list, in a desire to make it as complete as possible on the first attempt. Thanks are due in particular to Geneviève Desportes, P.H. Enckell, the Faroese National Library, the Faroese Ornithological Society, Peter Gjelstrup, Jens-Kjeld S. Jensen, Jóhannes Jóhansen, Svend Kaaber, Uwe Kordeck, Finnur Lützen, Erik Mortensen, Arne Nørrevang, Bergur Olsen, Aksal Poulsen, Søren Sørensen and Norbert Vogt.

A great thank to Kate Sanderson for proofreading.
